**Biosafety Level 1** is suitable for work involving well-characterized agents not known to consistently cause disease in immunocompetent adult humans, and present minimal potential hazard to laboratory personnel and the environment. Special containment equipment or facility design is not required, but may be used as determined by appropriate risk assessment. The following standard practices apply to BSL-1 (Biosafety in Microbiological and Biomedical Laboratories, 5<sup>th</sup> Edition, HHS Publication No. (CDC) 21-1112, Revised December 2009.

- Access to the laboratory is controlled and enforced.
- Laboratory personnel are trained on the hazards associated with handling the material and on standard cell/microbiological practices prior to beginning work and at least annually thereafter.
- Laboratory personnel are supervised by a scientist with training in microbiology or a related science.
- Personal protective equipment is provided and use is enforced.
- Decontamination procedures are in place and enforced for work surfaces, spills and biohazardous waste.

$\hfill \square$ I acknowledge that these policies apply to this fac	cility and are enforced by our institutional policies and procedures.
